SUMMARY

BI engineer with ten years of Qlik Sense, plus Power BI and SQL. For seven years I managed sales at a veterinary distributor, met every annual sales target as director, and kept developing its BI apps. Since 2024 I have built my own data products, including a used-car pricing tool sold to a dealer.

EXPERIENCE

Co-founder & Data Engineer · Informar Dados, Brazil (remote) · Feb 2024 – present

- Built InfoCars, a pricing tool for used-car dealers. It collects listings daily with Python and stores about 250,000 ads in PostgreSQL.
- Standardised 5,114 model spellings into 641 models.
- Built Power BI dashboards to compare prices and flag overpriced stock.
- Sold the tool to a car dealer. It saved about €300 per negotiation and cut time in stock to 1–3 months.
- Added a chat assistant on the Claude API that reads only approved tables. Chose it over OpenAI and Grok after testing all three.
- Developed a management system for small coffee businesses with my business partner.

Data Engineer · Rover, IT and analytics consultancy, Brazil (remote) · Oct 2023 – Feb 2024

- Built and maintained a Qlik Sense app for a large home-goods retailer, covering purchasing, replenishment for 17 stores and shelf availability.
- Measured forecast accuracy with Bias and MAPE to show where stock was too high or too low.

Commercial Director · Central Veterinária, veterinary products distributor, Uberlândia, Brazil · Nov 2019 – Aug 2023

- Led sales and operations. Met the annual sales targets in all four years. Three managers reported to me (pet distribution, call centre, e-commerce), about 20 people in total.
- Developed and maintained the company's seven main Qlik Sense apps on Oracle, used by the company's 10 managers: sales, four business segments, daily cash-flow projection and sales-rep visits.
- Rebuilt the apps in Power BI for comparison. Kept Qlik for performance and Oracle connectivity.
- Negotiated supply agreements with multinational pharmaceutical manufacturers.

Commercial Manager · Central Veterinária · Aug 2016 – Nov 2019

- Managed the pet segment sales team of 10 (1 coordinator, 6 sales reps, 3 promoters).
- Responsible for purchasing, tax and pricing, and for customer, demand and active-customer analysis.
- Kept developing the company's Qlik Sense apps.

BI Analyst · Central Veterinária · Aug 2015 – Aug 2016

- Built the data models and first versions of the company's main Qlik Sense apps. Promoted to Commercial Manager.

PORTFOLIO

Retail sales and stock-outs (Walmart M5 data) · 2026 · SQL, dbt, DuckDB, Power BI · guilhermerigonato.com/5-retail-bi

- Modelled five years of sales from 10 stores (47.7M rows) in a star schema with dbt, with 17 data tests.
- Compared the winning M5 forecast with actual sales: 5% error per store-day, 75% per item-day.
- Estimated about $0.79M a year (1.7% of revenue) lost to likely stock-outs.

Six more projects at guilhermerigonato.com, most with live Power BI reports: budget vs actual (FP&A), Portuguese public procurement, sales director dashboard, used-car pricing, housing affordability and a budget-debate fact-check.

SKILLS

- **BI:** Qlik Sense (load script, data modelling, set analysis), Power BI (DAX, Power Query), KPI design
- **Data:** SQL (Oracle, PostgreSQL, DuckDB), dbt, Python, ETL, Git
- **AI:** Claude API, OpenAI API, text-to-SQL
- **Languages:** Portuguese (native), English (C1)

EDUCATION

- Postgraduate in Enterprise Data Science & Analytics · NOVA IMS, Lisbon · from Feb 2027
- Specialisation in Business Intelligence · Academia IN, São Paulo · 2016
- BSc Business Administration · Universidade Federal de Uberlândia
