SUMMARY

BI developer with ten years of Qlik Sense, plus Power BI, SQL and dbt. I spent seven years in sales leadership at a veterinary distributor: I met every annual sales target as commercial director and built the Qlik apps its managers used every day. I know what a sales or finance manager needs to see, and how to model the data to show it.

EXPERIENCE

Co-founder & BI Developer · Informar Dados, Brazil (remote) · Feb 2024 – present

- Built InfoCars, a pricing tool for used-car dealers: Python collects listings daily into PostgreSQL (about 250,000 ads); 5,114 model spellings standardised into 641 models.
- Built the Power BI dashboards that compare prices and flag overpriced stock. Sold the tool to a car dealer: it saved about €300 per negotiation and cut time in stock to 1–3 months.
- Added a chat assistant on the Claude API that answers questions from approved tables only, after testing it against OpenAI and Grok.

Data Engineer · Rover, IT and analytics consultancy, Brazil (remote) · Oct 2023 – Feb 2024

- Built and maintained a Qlik Sense app for a large home-goods retailer client: purchasing, replenishment for 17 stores and shelf availability, with forecast accuracy (Bias, MAPE) to show where stock was too high or too low.

Commercial Director · Central Veterinária, veterinary products distributor, Uberlândia, Brazil · Nov 2019 – Aug 2023

- Led sales and operations. Met the annual sales targets in all four years. Three managers reported to me (pet distribution, call centre, e-commerce), about 20 people in total.
- Developed and maintained the company's seven main Qlik Sense apps on Oracle, used by its 10 managers: sales, four business segments, daily cash-flow projection and sales-rep visits.
- Rebuilt the apps in Power BI to compare the two tools. Kept Qlik for performance and Oracle connectivity.
- Negotiated supply agreements with multinational pharmaceutical manufacturers.

Commercial Manager · Central Veterinária · Aug 2016 – Nov 2019

- Managed the pet segment sales team of 10 (1 coordinator, 6 sales reps, 3 promoters).
- Owned purchasing, tax and pricing, and the customer, demand and active-customer analysis. Kept developing the Qlik Sense apps.

BI Analyst · Central Veterinária · Aug 2015 – Aug 2016

- Built the data models and first versions of the company's main Qlik Sense apps. Promoted to Commercial Manager.

PORTFOLIO (CODE ON GITHUB, LIVE REPORTS ONLINE)

Sales director app for a distributor · 2026 · Qlik Sense, Power BI, dbt, DuckDB · guilhermerigonato.com/commercial-analytics

- One star schema (dbt, 23 models, 64 tests) built in Qlik Sense (load script, set analysis, master items) and in Power BI (TMDL, DAX, calculation groups).
- Row-level security with three roles: sales rep, regional manager, sales director. Every change to the model is checked in GitHub Actions against Microsoft's Best Practice Analyzer rules.
- Finds the region that fell 16.5% after a rep left, the rep giving 15% discount against 6%, and 225 customers with no visit in 60 days.

Budget vs actual for a group in four countries (FP&A) · 2026 · Power BI, Qlik Sense, dbt

- Budget vs actual, 9+3 reforecast, EBITDA bridge and price-volume-mix in two currencies, with ledger checks before close; row-level security in Power BI, section access in Qlik.

Retail sales and stock-outs (Walmart M5 data) · 2026 · SQL, dbt, DuckDB, Power BI

- 47.7M rows from 10 stores in a dbt star schema; about $0.79M a year (1.7% of revenue) lost to likely stock-outs.

Also: Portuguese public procurement (1.55M contracts), used-car pricing, housing affordability (Eurostat) and a budget-debate fact-check.

SKILLS

- **BI:** Qlik Sense (load script, data modelling, set analysis, section access, master items), Power BI (DAX, Power Query, row-level security, calculation groups, PBIP/TMDL, Tabular Editor), KPI design
- **Data and AI:** SQL (Oracle, PostgreSQL, DuckDB), dbt, Python, ETL, Git, GitHub Actions, Excel, Claude and OpenAI APIs
- **Languages:** Portuguese (native), English (C1)

EDUCATION

- Postgraduate in Enterprise Data Science & Analytics · NOVA IMS, Lisbon · from Feb 2027
- Specialisation in Business Intelligence · Academia IN, São Paulo · 2016
- BSc Business Administration · Universidade Federal de Uberlândia
